CAST BRONZE SERVICE SADDLE

APPLICATIONS:

ROBAR **2706** Service Saddles are used to take a service outlet off a transmission or distribution line. Waterworks Bronze and passivated T304 Stainless Steel are “noble” materials which are closely related to each other near the top of the Galvanic Scale of corrosion resistance. Unlike pairs of widely dissimilar metals, they will both exhibit long life in most ‘hot’ soil environments. Can be used on PVC-C900, Ductile, Iron, Steel, HDPE and AC pipe.

MATERIAL SPECIFICATIONS:

Saddle Body: Cast Bronze.
 Gasket: SBR (Buna S) Rubber.
 Saddle Straps: T304 Stainless Steel, rolled threads, fully passivated*.
 Fasteners: 1/2" NC T304 Stainless Steel.
 Nuts coated with anti-galling compound.
 Torque is 45 ft. lbs.

HOW TO ORDER:

Determine the product number (**2706**), the actual OD (see Table on page 2.4.2), outlet size, outlet thread, and strap style, and order by using appropriate ordering code as shown in the following example:

If a 6" Double strap (DS) Saddle with a 3/4" CC tap is required for a 6" Ductile Iron pipe (6.90" OD), the ordering code is:

2706 - 7.45" x 3/4" - CC - DS
 product high outlet outlet strap
 number end size thread style

i.e. **2706 - 7.45 x 3/4 - CC - DS**

If a 12" Double strap (DS) Saddle with a 2" IP tap is required for a 12" C900 PVC pipe (13.20" OD), the ordering code is:

2706 - 13.30" x 2" - IP - DS
 product high outlet outlet strap
 number end size thread style

i.e. **2706 - 13.30 x 2 - IP - DS**

Note: Some saddles have more than one strap size available. Please specify what range you require by stating the high end (H=___) as shown in the above example.

Note: * Refers to chemically treating Stainless Steel after welding (“Pickled/Passivated”) to return it to its original appearance.
 - The **2706** is NSF61 compliant. Only those products bearing the NSF61 logo stamp are compliant.
