DISCONTINUED PRODUCT NOTICE

5516, 5526, 5536 & 5518, 5528, 5538
Fabricated SS Repair Clamps with **Cast Ductile Lugs**

Please be advised that Robar Industries has made our line of 5500 Series of Repair Clamps with **Cast Ductile Lugs** obsolete.

With our best-selling 5600 Series of Repair Clamps, Robar has a far more superior and very well stocked All Stainless-Steel version available as an alternative.

This decision was not made in haste but rather following a thorough analysis of our historical sales of the 5500 Series of Repair Clamps. This line has been a low single-digit percentage of our overall repair clamp sales for many years and this lack of sales volume for the 5500 has led us to this conclusion.

Please feel free to reach out to your local Robar Industries representative for any assistance required with any related municipal specification review.

Sincerely,

Jonathan Reinheimer
